# Website Plan

**Website Name:** Petrichor

**Site Purpose:** To tell the weather for those who are seeking for the incoming changes on the atmosphere.

**Target Audience:** Petrichor means the smell of rain. It's usually a word that people use when they have an affinity or like for rain. The target of this weather site will be for people to check if it's going to be a soothing, hot cup-o-cocoa type of weather or not.

**Site Map:**

**Color Scheme:** Will be experimenting on a complimentary colour scheme of blue and orange. Will be using all or some of these colours on the scheme.

**Typography:** I want to use two fonts and stick to it as not to make it congested. The fonts will be Cardo (serif) and Josefin Sans (sans-serif). The titles, headings, and other will be in sans-serif / Josefin Sans, while the rest will be in serif / Cardo.
